• If your Mac only has USB C port, you will need a genuine Apple USB-C to USB female adapter for connection. And please plug the USB adapter into your Mac first, then connect the mic with the adapter.

Input Settings

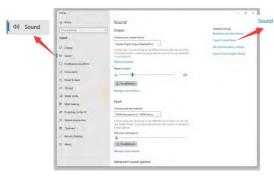

Plug the USB cable into your computer and the RGB lighting will be on. indicating the mic is powered. Please wait for a few seconds when first time operation, since driver of microphone takes time to automatically install. There may be no pop-up window or message though. (If plugging USB plug in a different USB port, driver installs again).

After installation, you can test the mic by speaking to it. If the mic picks up no sound, please follow procedures below.

1) Right-click the speaker icon at the bottom right of the screen. Click

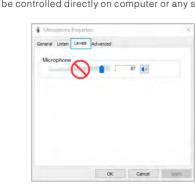

2) Click the Sound control panel.

3) Select the Recording tab, and choose "FIFINE Microphone" as the default device. When you speak to mic, bar-type icon will turn green and bounce. If it remains unchanged, please reset computer and replug the mic in another USB port. If there's still no "FIFINE Microphone", please contact Fifine after sales service.

4) The mic input level is only controlled by the gain knob on the mic, and cannot be controlled directly on computer or any software.

2. Output Settings

1) Confirm the loudspeaker is open.

2) Click the loudspeaker is being used-"Properties"--"levels", drag progress bar to adjust volume of output

3) If you want to monitor your recording, click Microphone "FIFINE Microphone" - "Properties" - "Listen" - click"Listen to this device" -"Apply". No sound is heard through earphone/ built-in speaker of computer, if you don't follow this procedure. Tips: Click off "Listen to this device" when you are using any recording software or chatting software(Skype).

microph General Listen Custom Levels Advanced ou can listen to a portable music player or other device through his Microphone jack. If you connect a microphone, you may he

Tips:(Applicable for MAC and Windows)

- 1. If computer prompts that it's unable to identify USB devices, please restart computer and replug the microphone into rear back USB port of your computer.
- 2. If the mic is recognized but no sound coming out, please check whether System Sound is muted and make sure the RGB lighting is on (means the mic is active).
- 3. If the mic is recognized but no sound comes out, and your PC is running on Windows 10, please go to settings > privacy > microphone and click the "Allow apps to access the microphone" to ON, then restart vour PC.
- 4. If the sound of your mic is inconsistent or the volume randomly changes, please disable the sound activated recording function of the application (like "Automatically adjust volume" of Zoom). And if you're using Windows computer, please go to Settings-Privacy-Microphone, disable XBOX Console Companion and XBOX Game Bar

RECORDING SOFTWARE SETTINGS 1. Make sure you have the correct input / output selected.

Tips: log out the [Audacity] (or other recording software you are using) if you find the USB microphone is unavailable. And restart the software after the mic is re-plugged.

4. To get the optimum result, we suggest to speak into the mic within 7

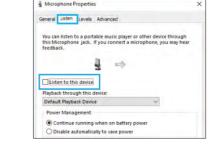

5. Turn down the mic gain first, and then turn it up gradually until you get the

inch and always have the pop filter facing you.

Output: Pls choose your output device as needed

2. Make sure click off "listen to this device" in your computer system when you are using any recording software, or else you would hear duet of yourself just like too much echo.

interested subject.

3. There are several ways to improve the usage. Come to

FIFINEMICROPHONE.COM, find Technical Support under

Apple computers, you can use Apple's own QuickTime player to test the recording.

Selecting software

Microphone option.

the "SUPPORT" tab or type the https://fifinemicrophone.com/pages/knowledge-base user's mouth, instrument or any other sound source. directly to search the Technical Support solution for your singing. The same position is optimal when miking an 4. For windows computers, we recommend Audacity, and for

Setting your software levels

Correct adjustment of microphone level is important for optimum performance. Ideally, the microphone level should be as high as possible without overloading the input of your computer. If you hear distortion, or if your recording program shows levels that are consistently overloaded (at peak levels), turn the microphone volume (or level) down through the gain control on the mic. If your recording program shows insufficient level, you can increase the microphone gain through the gain control on the mic.

You have many choices in recording software. Audacity, available for free online at http://audacity.sourceforge.net/, is a widely used software.

If you plug in the mic AFTER you load Audacity, it may not recognize the mic while it may still record, the results will be unsatisfactory. If that happens, just restart Audacity AFTER plugging the USB into your computer and click on the FIFINE

Positioning the side-address mic

have the mic capsule (the side with pop filter)pointed at the For speaking/singing applications, the ideal position of the microphone is directly in front of the person who is speaking/ instrument such as an acoustic guitar, drums or piano. Test the mic in different distances to find the best sound for your

Protecting your microphone

Avoid leaving your microphone in the open air or in areas where temperatures exceed 110° F (43° C) for extended periods. Extremely high humidity should also be avoided.
